Eine KI macht Jagd auf Ladendiebe

Ladendiebstahl ist ein Dauerproblem im stationären Handel. Ein Start-up hat jetzt eine Technik-Lösung entwickelt, mit der man die Tricks der Langfinger durchschauen kann. Globus profitiert bereits davon.

von Etailment Redaktion Donnerstag, 11. Juli 2019

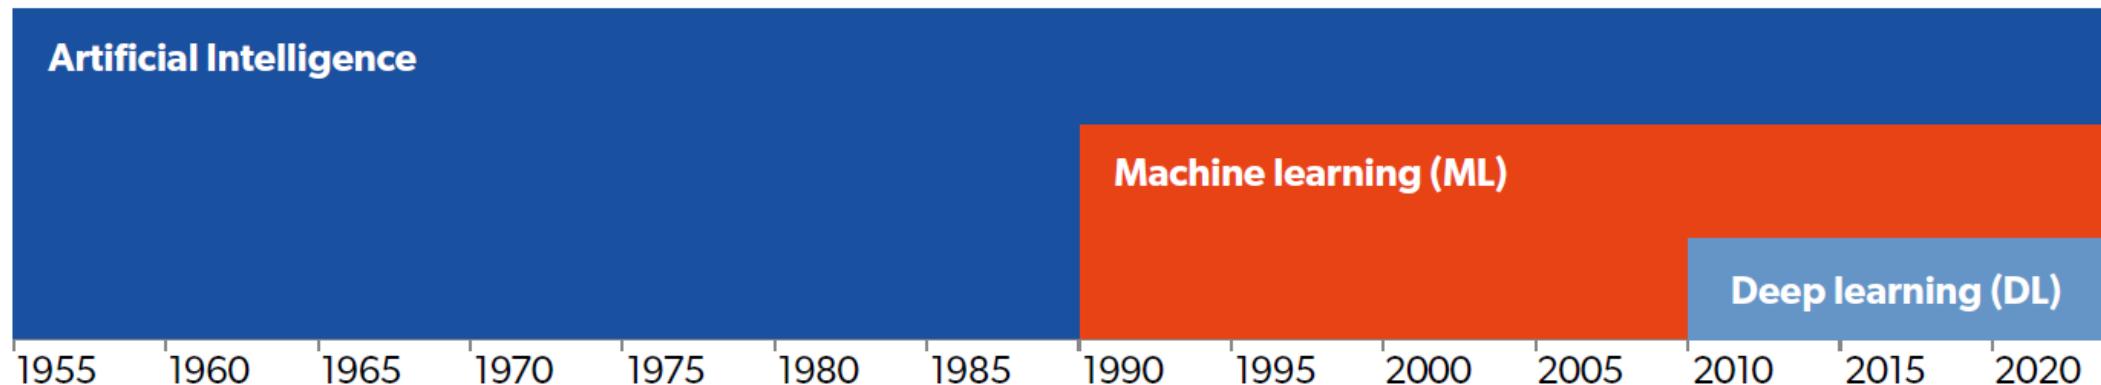

Sector	Core use cases:			
Asset Management	Investment strategy	Portfolio construction	Risk management	Client service
Healthcare	Diagnostics	Drug discovery	Monitoring	
Insurance	Risk assessment	Claims processing	Fraud detection	Customer service
Law & compliance	Case law	Discovery and due diligence	Litigation strategy	Compliance
Manufacturing	Predictive maintenance	Asset performance	Utility optimisation	
Retail	Customer segmentation	Content personalisation	Price optimisation	Churn prediction
Transport	Autonomous vehicles	Infrastructure optimisation	Fleet management	Control applications
Utilities	Supply management	Demand optimisation	Security	Customer experience

We tried building a use case for our business...

The Evolution of AI: Deep learning

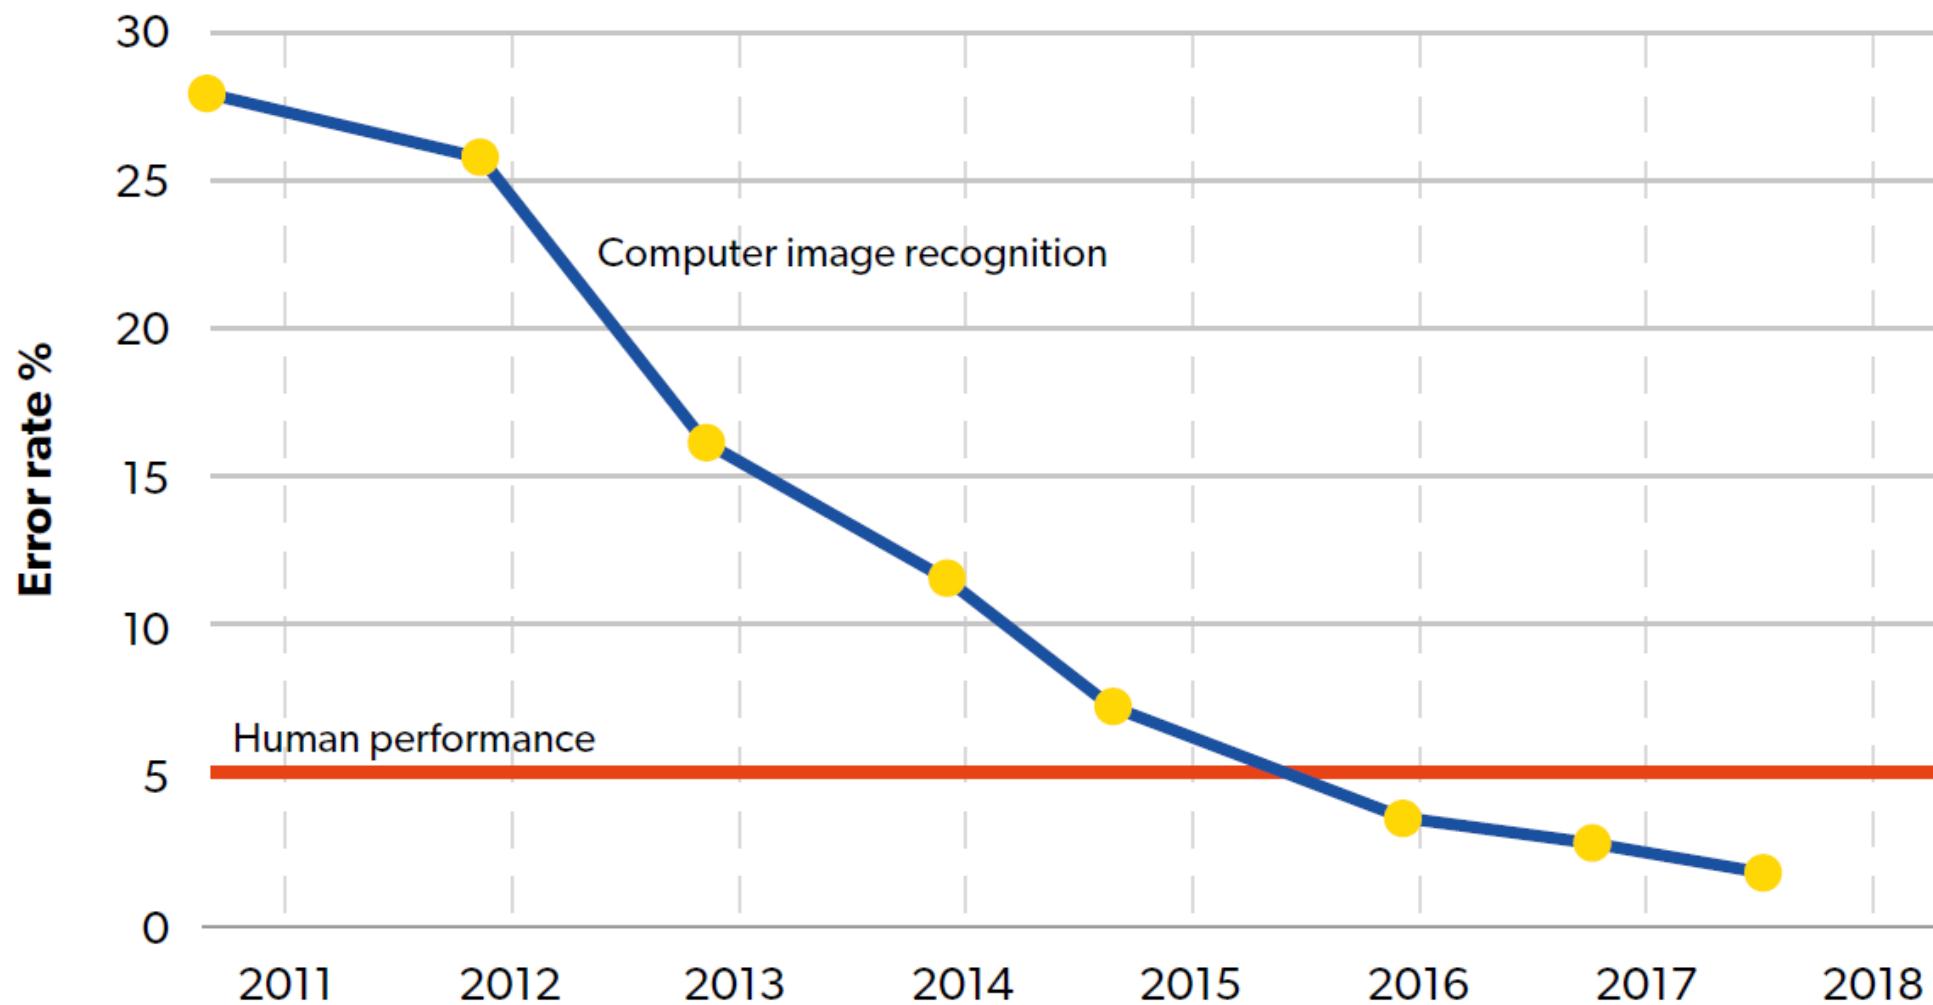

Source: MMC Ventures

Machine learning enables programs to learn through training, instead of being programmed with rules.

By processing training data, machine learning systems provide results that improve with experience.

ImageNet Image Recognition

KI in der Hosentasche

 Image may contain: night, sky and outdoor

 Image may contain: flower

 Image may contain: tree, sky, outdoor and nature

 Image may contain: sky, cloud and outdoor

 Image may contain: one or more people, people sitting, shoes and indoor

 Image may contain: people standing

 Image may contain: 1 person, outdoor

 Image may contain: 1 person, sky, outdoor

 Image may contain: 2 people, people

your Profile Photo, Image
may contain: 6 people,
indoor

What We Do

Behavioral Insights. Real Life Outcomes.

PRS IN VIVO helps marketers to improve shopper and consumer experiences, enhance people's lives and contribute to a better world.

We offer insight & consultancy, grounded in behavioral science, to accurately understand, predict & influence consumer choice.

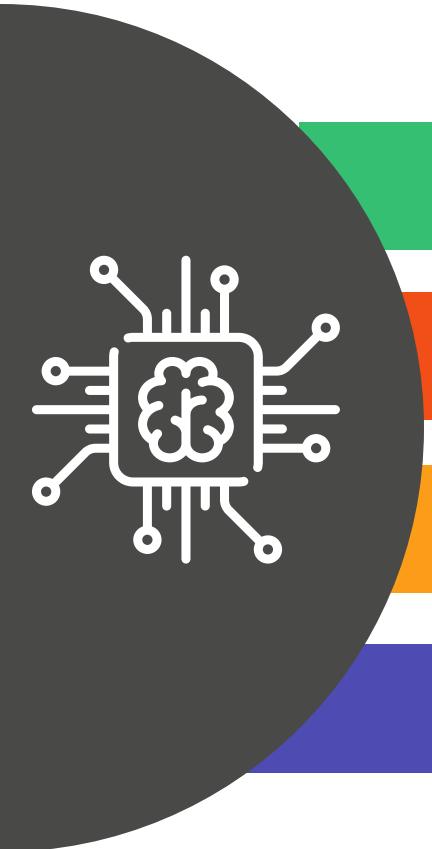

We help clients succeed through the passion & engagement of our team, our constant pursuit of best-in-class expertise & our trusted, proven, innovative & agile solutions.

**Bei PRS IN VIVO führen
wir weltweit pro Jahr
mehr als 1.000 Studien zu
Verpackungen durch**

Unsere Lernkurve

Wir haben angefangen, Daten und Expertise zu kombinieren

Dann haben wir Designsysteme anders klassifiziert und kodiert

Wir haben mit einem KI Unternehmen kooperiert, um ein Vorhersagemodell für Verpackungsdesign zu entwickeln

Wir haben gelernt, dass wir weit kommen, aber nicht weit genug...

Unsere Testdatenbank verstehen, um sie für den Einsatz vorzubereiten

Welche KPIs und Kennzahlen sind im Hinblick auf den Markterfolg validiert?

Sichtbarkeit, Auffindbarkeit, Kauf am Regal, etc.

Welche Beziehungen bestehen innerhalb und zwischen Kennzahlen?

Welche KPIs sind linearer Natur? Welche sind „verwandt“?

Wie groß ist der Einfluss unterschiedlicher Voraussetzungen?

Relaunch & Neuproduct, Große Marken vs. Herausforderer, etc.

Auf Basis unserer Testdatenbank mit mehr als 30.000 Studien haben wir den AI Algorithmus trainiert...

Pack Predictive Model

TEXTUAL UNITS

Textual Units

- Umbrella Brand (ex Danone)
- Sub Brand (ex Taittinge)
- Product Brand (ex Cremosso)
- Type of product (ex plain yogurt)
- Product composition (ex Bifidus)
- Variety or perfume (ex lemon)
- Weight or contenance (ex 4x 125 g)
- Promises product bloc (ex more sweet)
- Non permanent promotion bloc (a gift)
- Permanent promotion bloc (ex + 10%)
- Other textual units

For each textual units define:

Presence	Number	Pack change vs Current pack	Intensity of change
Yes	Only for promises product	No change	No change
No		Typography	Low change
		Size +	Medium change
		Size -	Strong change
		Color	
		location	
		Name	
		Shape	
		addition	
		Remove	
		Other	

Pack Predictive Model

VISUAL UNITS

Visual Units

- Product Visual
- Visual of the ingredients of the product
- Icon associated with the brand
- Character
- Transparency of the product
- Abstract drawings
- Figurative drawings

For each visual units define:

Presence	Number	Pack change vs Current pack	Intensity of change
Yes	Only for Abstract drawings and Figurative drawings	No change	No change
No		Size +	Low change
		Size -	Medium change
		Color	Strong change
		location	
		Name	
		Shape	
		addition	
		Remove	
		Other	

Pack Predictive Model

COLOR UNITS

Color Units

- Number of colors
- Dominant colors
- Secondary colors

For Dominant and secondary colors define:

Presence	Number	Pack change vs Current pack	Intensity of change	Specificity of the color vs Product Category	Pack change vs Current pack
Yes	No change	No change	Specific	No change	
No	Color	Low change	Category	Specific	
	Nuances	Medium change	Variety	Category	
	Addition 1 color	Strong change		Variety	
	Addition several colors				
	Other				

Pack Predictive Model

PACKAGING FEATURES

Nature of the material

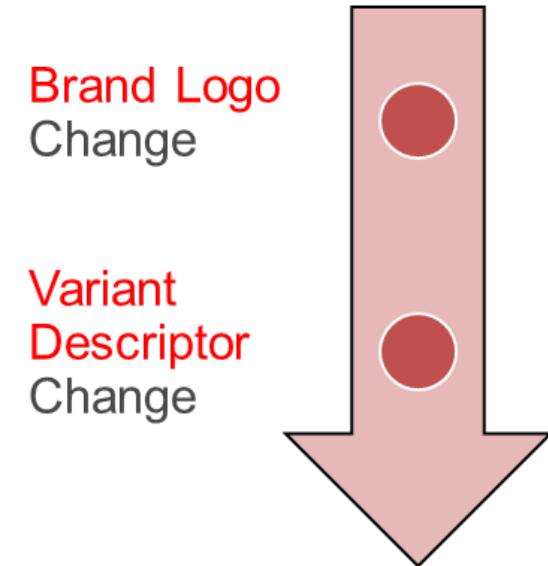

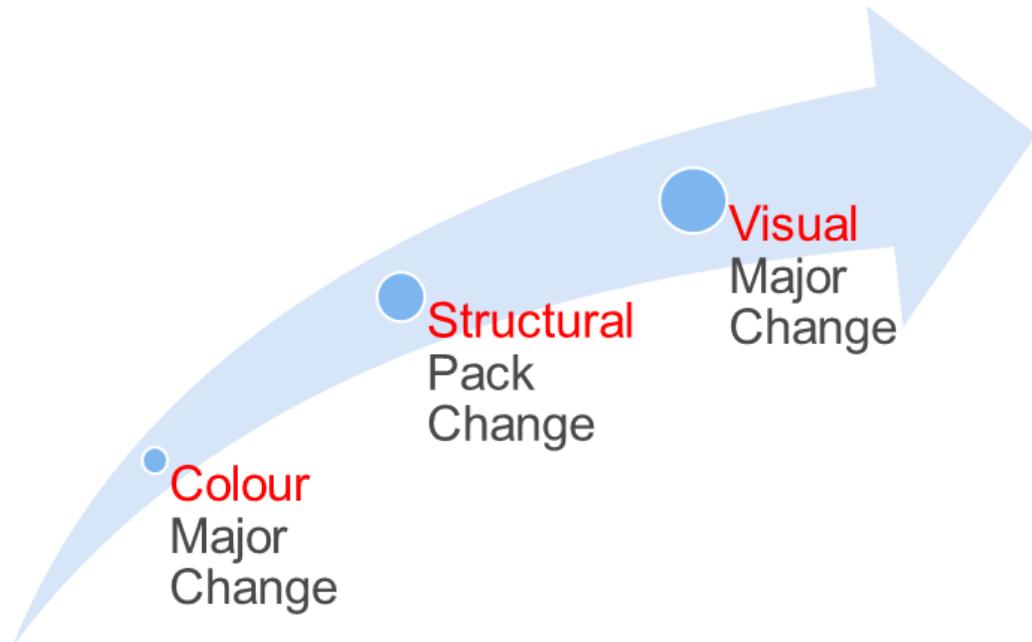

Nature	Intensity of change	Specificity of the color vs Product Category	Pack change vs Current pack
Carton	No change	Specific	No change
Plastic	Low change	Category	Specific
Composite	Medium change		Category
Metal	Strong change		
Glass			
Other			

Shape of packaging

Shape	Intensity of change	Specificity of the color vs Product Category	Pack change vs Current pack
Circular	No change	Specific	No change
Square	Low change	Category	Specific
rectangular	Medium change		Category
Oval	Strong change		
Triangular			
Domes			
Other			

Improvements in on-shelf metrics
were correlated to changes on
these dimensions...

...While major declines in on-shelf
were correlated to changes in
Branding/Logo or Variants.

AI MODEL - BUILT ON PAST TESTS DATABASE

Precise documentation in the model of:

- the category specificities
- the geography and other elements
- For each tested, route: the changes vs current pack
(logo, colors, product rep, font, etc....)

The model produces a probability of performance, based
on past tests registered in the database

→ RANKING OF ALL THE TESTED ROUTES

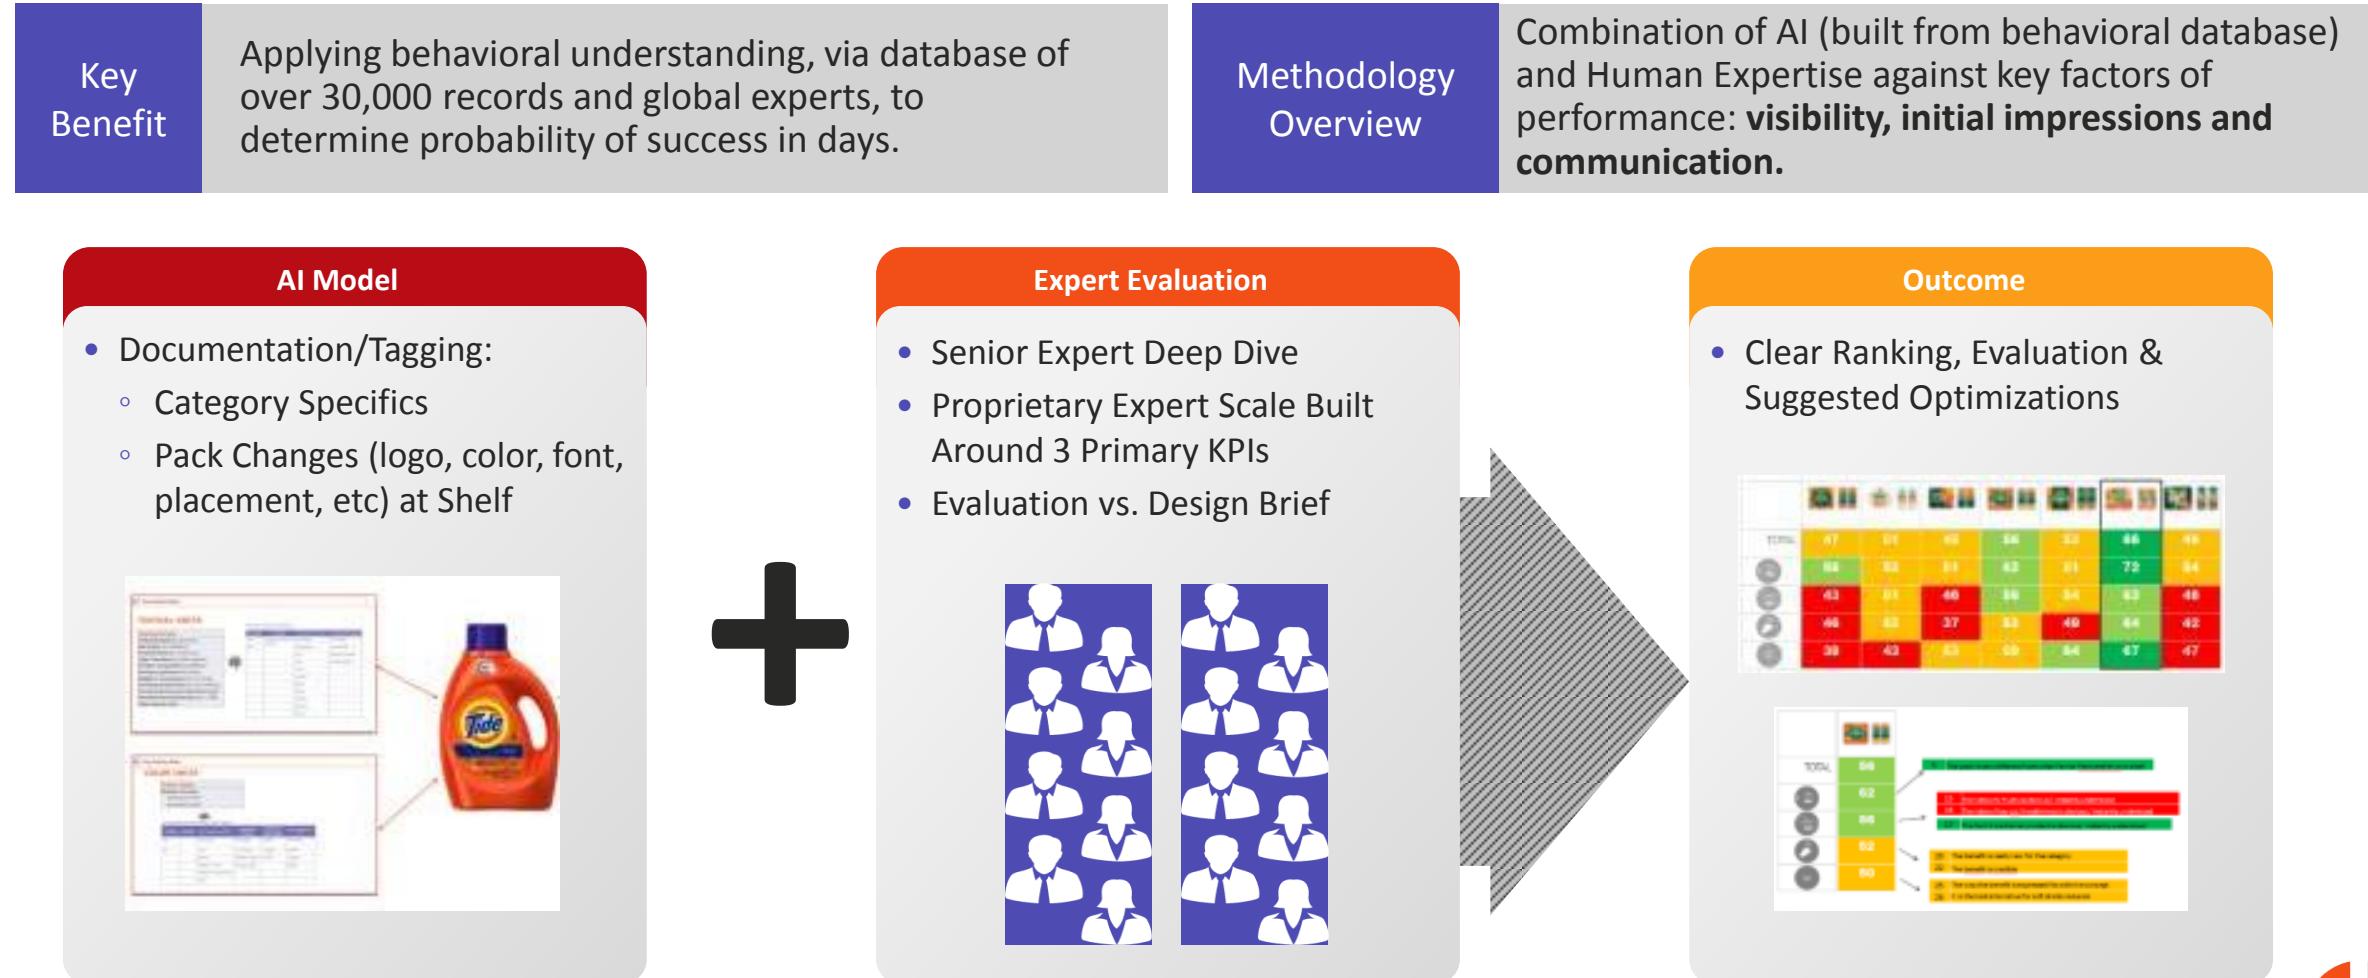

**But the AI remains blind in
regards to brand context and
reasons why**

COMPLEMENTARY EXPERT EVALUATION

- PRS INVIVO Senior experts team evaluation, to dig deeper into the why of the ranking
- Based on our proprietary expert scale built on 3 KPI (visibility / first impression / communication).
- These evaluations are themselves weighed by coefficients derived from the algorithm.

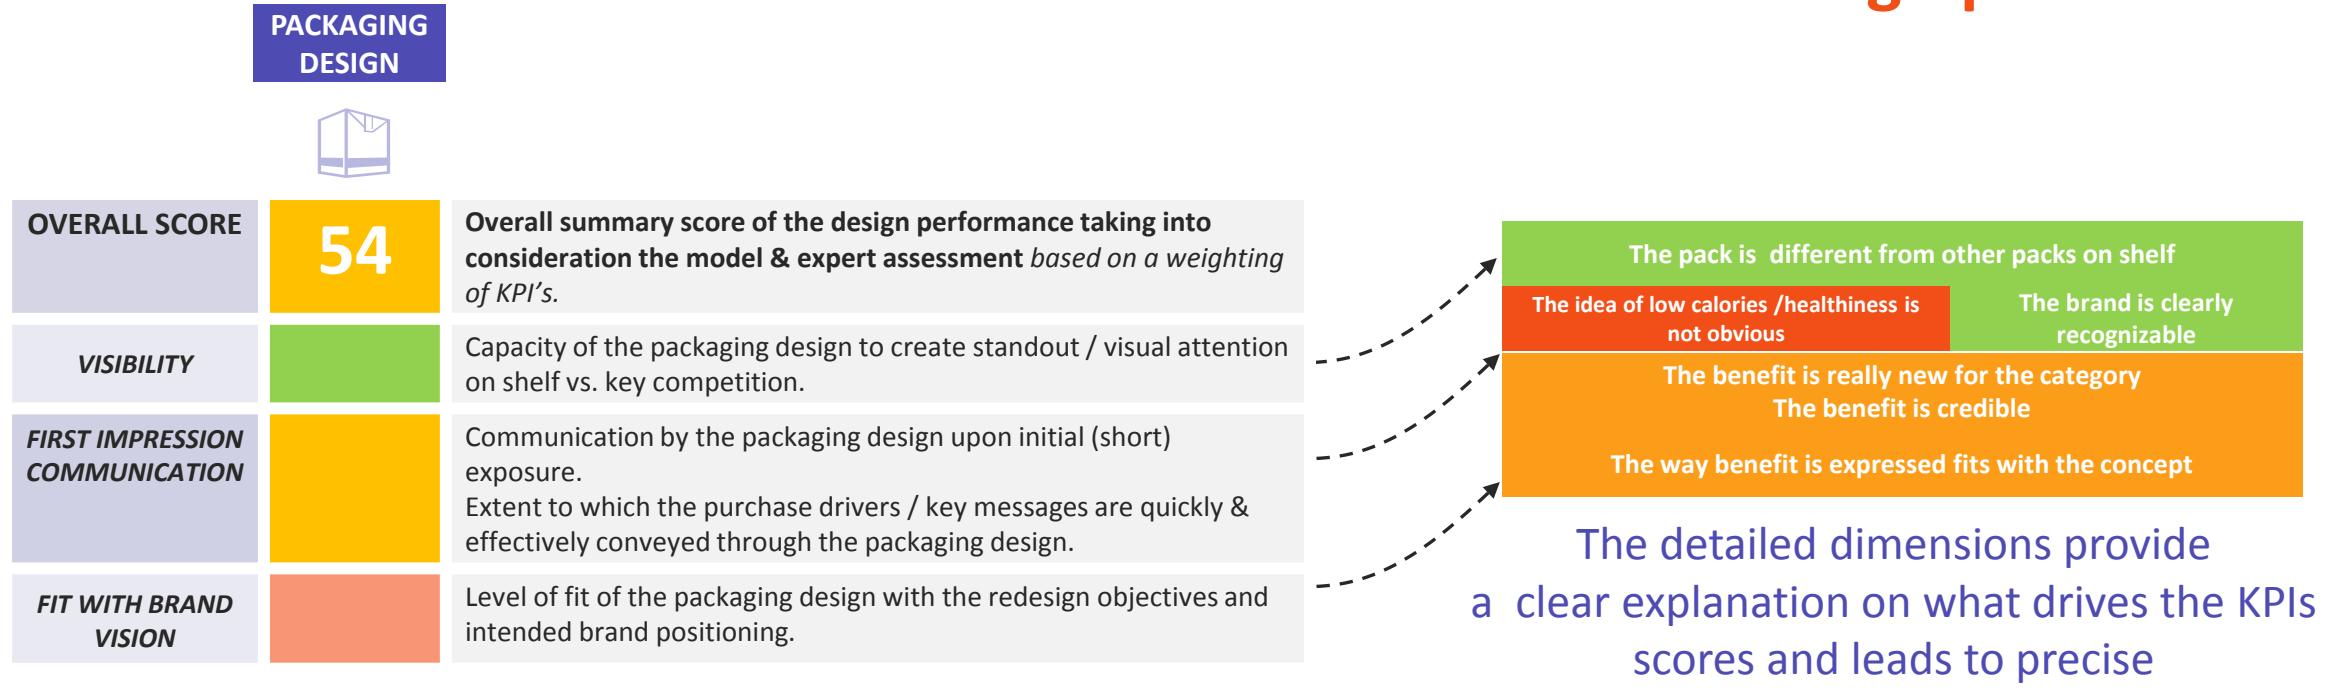

AI Pack Screener®: Methodology

AI Pack Screener® – Reporting Output

A clear ranking of the routes...

...and a “Deeper Dive”
on the leading option

Color coding of overall score & KPIs:

*Limited opportunity
(vs. Current)*

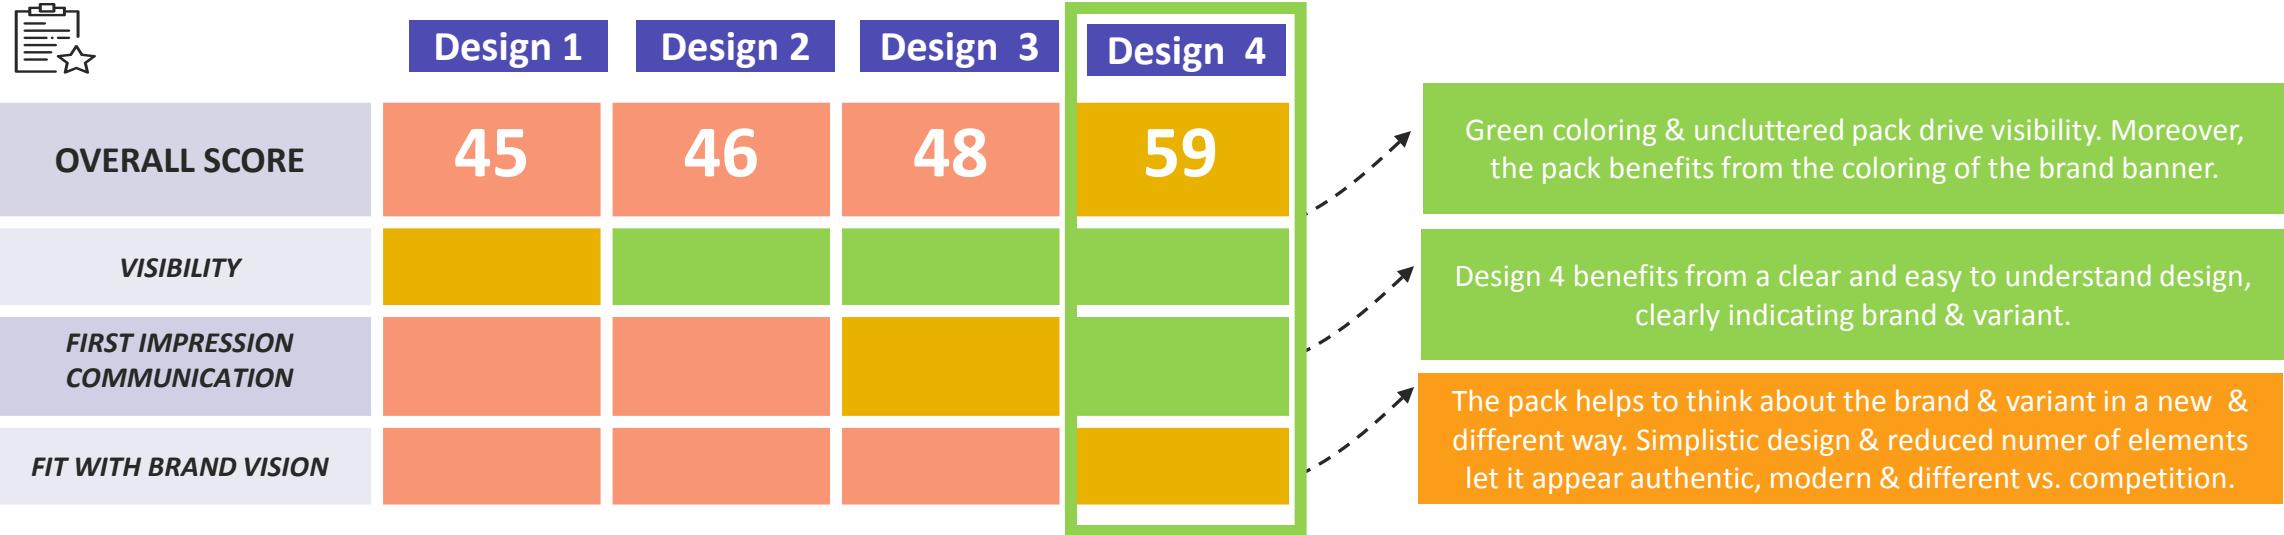

*Good opportunity
(vs. Current)*

AI Screener® – A Case Study

It is recommended to move forward with *Design 4*

However, room for further improving the design 4 exists as it only provides rather limited opportunity vs. Current.

- *Enhance more explicit refreshment cues*
- *Underline uniqueness of the product type*

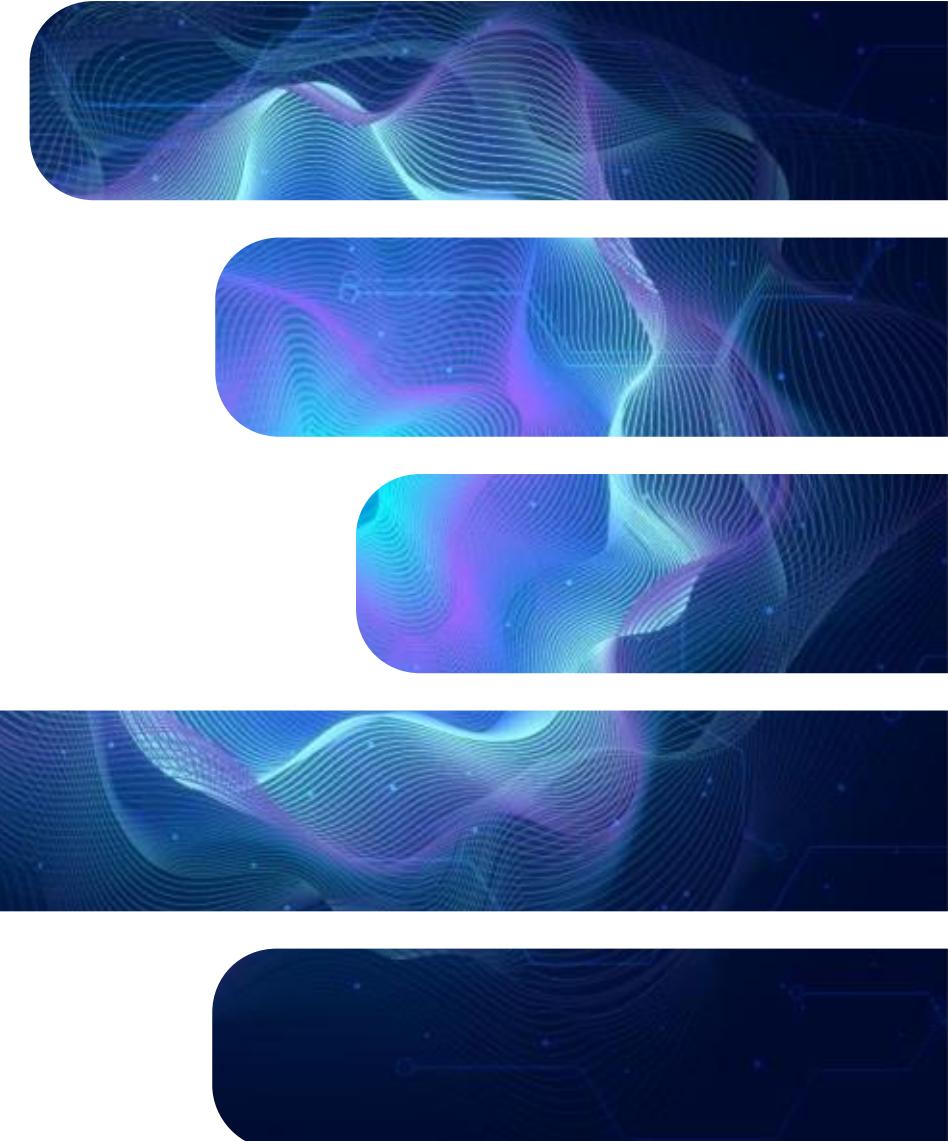

AI Pack Screener: Integration von Daten, Expertenurteilen und Künstlicher Intelligenz

Einsatz von Künstlicher Intelligenz

- Anwenden des AI Algorithmus, basierend auf der PRS IN VIVO Datenbank
- Konsistenter Bewertungsprozesses, der die PRS IN VIVO-Kernmethodik und deren KPIs wiederspiegelt (Sichtbarkeit, sofortige Kommunikation usw.)

Angereichert mit menschlicher Expertise

- Experten von PRS IN VIVO sind erforderlich, um eine ganzheitliche Perspektive zu bieten sowie auf die Marke und deren Marktsituation zugeschnittene Dimensionen / Strategien zu integrieren
- Zu jeder Studie gehört ein globales Team von Senior PRS IN VIVO Experten, die alle umfassend im Screening-Prozess geschult wurden

Übergeordnete Erkenntnisse

NEW THINKING (BEHAVIORAL SCIENCE)

Berücksichtigung von Behavioural Economics: Wir konnten das Modell auf Basis von Verhaltensdaten aus tausenden von Studien in unserer historischen Datenbank erstellen

NEW DATA & ANALYTICS

Partnership: Es gab keine Berührungsängste mit KI-Experten zu kooperieren und die Limitationen der eigenen Kompetenz im Bereich KI anzuerkennen

INCREASED TIME & BUDGET PRESSURE

Echter Kundenmehrwert: Ergebnisse liegen 4 Tage nach Lieferung der Designs vor – zu einem Bruchteil der Kosten von traditionellen Verfahren

That's all Folks!
